

THE JASPER BUNGALOW

YOUR LOT, YOUR DREAM, CUSTOM BUILT.

OVERVIEW

 **1104 SQ. FT.***

 **2 BEDROOMS**

 **1 BATH**

Simplify without giving up the space you need. The living space has been multiplied and enhanced with an open concept design. The island in the kitchen separates the food preparation area yet leaves plenty of room for conversation. The generous living and dining area can be used for informal family gatherings and formal dinners. You will really like the walk-in closet in the master suite. Whether you choose carpet or hardwood, vinyl or ceramic, you can make this home your very own when you choose from the many Royal Home options.

CUSTOMIZATION & OPTIONS:

- The Porch is awesome, but lets upgrade it to vinyl railing, and spindles so we don't have to think about painting - no maintenance that is what I like
- For the entrance, put in ceramic tile, and treat yourself, add in floor heating
- With a more traditional look in mind, have your cabinets customized so that it looks more like pieces of furniture - the possibilities are endless
